

TECHNICAL DATASHEET

90mm Extension (17-EXTW)

Product Code: 17-EXTW

Description:

A valuable extension increasing the depth covered by all Weepa's.

Applications:

For use in applications with thicker walls and in combination with any Weepa covering a wide range of brick and block sizes.

Examples include:

- For 140-150mm block work use a 70mm Weepa with the Extension.
- For 190-200mm block work use a standard length Weepa with the Extension.

Note - Be sure to use the correct Weepa to suit your application and Bushfire Attack Level (BAL) requirements. [Click here](#) for further details.

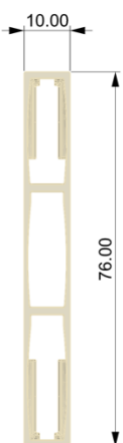

Installation:

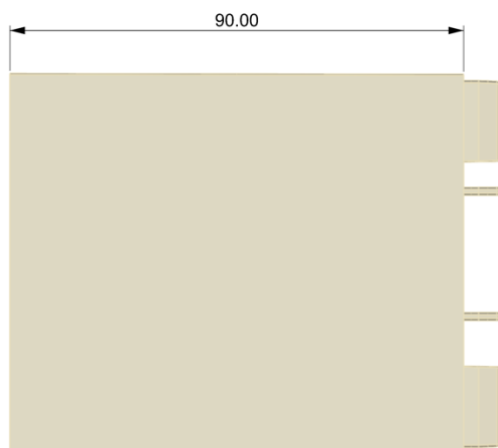

Designed to be installed in combination with any Weepa to form beautiful weep holes in thicker brick and block walls and keep the weep hole free of mortar. Does not lock on so Extension and Weepa decouple when renderer is adjusting the Weepa for depth.

Component	Material
Body	Polypropylene (PP, recyclable)

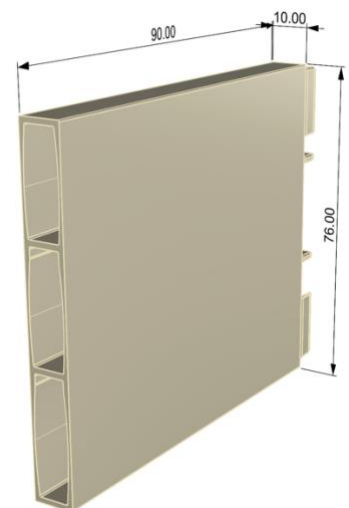

Dimensions	90mm x 76mm x 10mm (see below)
